# Down flow unit

## Product protection

The down flow unit, type IF/DF from Interflow, is characterised by its compact construction, great ease of operation and is solid and reliable. The unit can be used flexibly. For example, you can hang the down flow unit above your production facility but also place it on a base frame to create - with one or more units - a conditioned working space.

- Manufactured from high-quality HPL material
- Completely smooth executed both internally and externally
- Customised solutions possible
- Installation and validation on site
- Can be installed singly or in series

### Safe to use

- Complies with guideline IEST-RP-CC002.4
- Meets at least Class 5 according to ISO 14644
- Deployable in accordance with GMP standards
- CE-marking
- Fail-safe design
- Hermetic bonding

### Comfortable

- Homogeneous light
- Low heat load
- Ergonomic top design

### User-friendly

- Easy to operate
- Effortless cleaning
- Front filters can be easily replaced from above
- Absolute filter can be replaced from the bottom
- Plug-and-play
- Optimal air distribution

### Sustainable

- Up to 70% reduction in energy consumption thanks to energy-saving EC motor
- Energy-saving LED lighting
- Day and night switch as standard
